

## MORE AMAZING PRIZES NOW OFFERED IN THE 2HOMES2WIN COMPETITION

2homes2win Crossword competition has added some more amazing prizes and promotions to their website due to the incredible response they have received. They have now included **5 free** website designs and a **free** entry into the competition if you place an advertisement on their website.

Do you know that having a link on a popular website can instantly increase your website popularity on a search engine? Website advertising is one of the best methods that business owners can use to get people to visit their website and create a 24-7 presence. They understand that you can only profit if you make more than you spend, so they are offering a very affordable way to promote your service or product.

When you place an advertisement with 2homes2win for a one off fee of £50.00 for twelve months you automatically get one **free** entry into the 2homes2win crossword competition. The advertisement may contain one photograph or logo no bigger than 75 x 75 pixels. A short description of your website or product you are advertising which is no longer than 300 characters. Once somebody clicks onto your advert it will open a new browser directly to your website. 2homes2win guarantee a minimum of 500 hits to their site on a daily basis. This is a great opportunity to get your website seen especially if you want more traffic to your site, if you want more exposure, if you want new customers, or if you are looking for a jump start for a new website or product launch.

When you enter the 2homes2win crossword competition you will now also stand the chance of winning a free website. The 5 free website designs are in conjunction with Euphoria Software based in Gauteng RSA. The teams at Euphoria are a winning combination of innovation and creativity. In an electronic economy, driven by digital technology, new media has revolutionised business, communication and markets. As a specialist software development, Euphoria Software's primary focus is the design and development of high quality systems, helping their clients successfully communicate and interact with customers, suppliers and employees.
